## Pediatric Advanced Life Support Renewal Course

This Pediatric Advanced Life Support (PALS) Provider course prepares participants to identify and treat cardiopulmonary arrest and common conditions that may lead to cardiopulmonary arrest in infants and children.

### Learning Objective

Participants should be able to demonstrate the following knowledge objectives and psychomotor skills at the end of the course:

- Review pediatric Basic Life Support (BLS).
- Recognize impending respiratory failure and shock.
- Initiate treatment based on the patient's physiologic status as identified by rapid cardiopulmonary assessment:
  - Provide basic and advanced airway management skills
  - Obtain vascular access
  - Initiate appropriate fluid and pharmacologic therapy.
  - Stabilize and evaluate the trauma victim
  - Initiate the first ten minutes of pediatric resuscitation
  - Triage the patient to definitive care
  - Participate in simulation training, using patient simulators
  - Provide support for patients, families, and fellow providers in coping with a child's critical illness, injury, and potential death.

### Course Faculty

Sanford PALS Instructors
